Student Emulation

At times, an instructor may want to view their VikingWeb course as a student would see it. In additional to being able to view the course as a student, instructors can also view the course as other roles that have been added to the course (teaching assistant or cross-listed students).

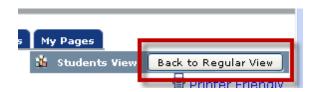

- 1. Log into VikingWeb and navigate to the appropriate course.
- 2. To change the view, select the appropriate view from the drop down box.

3. Click Change View.

4. To change back to the default view, click Back to Regular View.
