You must have a CPS database to use the CPS software. The database can be created on a classroom computer or a thumb drive. Please use proper security precautions when creating a database on a classroom computer.	
1. Open CPS.	
2. Click on File → New Database If you have one database on your computer or device already, CPS will automatically connect to it. To create a new database, click on File and New Database.	

For Additional Help:

For issues with eInstruction clickers or CPS software, you can contact eInstruction at **1-888-333-4988**. You can also visit their online support area and chat with an eInstruction representative at http://www.einstruction.com/support_downloads/index.html.

You can also contact the Center for Instructional Technology: Jerry Trammell – jtrammell@berry.edu – x2680 – 706-290-2680
