

Berry College Intellectual Property Policy

1. PURPOSE

Berry College (“College”) is dedicated to providing an environment that supports the creation and development of Intellectual Property by Faculty, Employees and Students. Such activities contribute to the academic and professional development of Faculty, Employees and Students, enhance the reputation of the College, and provide additional educational opportunities for participating Students. While Intellectual Property may, in some cases, be the product of a Creator and that Creator’s time and resources, oftentimes, the creation and development of Intellectual Property depends not only on the Creator’s ingenuity, time and resources but also on contributions (both monetary and otherwise) from the College and third parties. It is important, therefore, to stimulate the development of Intellectual Property by protecting the interests of all those involved in the creation and development of Intellectual Property at the College or using College Resources.

Accordingly, Berry College does hereby establish this IP Policy with respect to the development, protection, and transfer of rights to Intellectual Property resulting from the work of its Faculty, Employees, Students, and other third parties.

2. APPLICABILITY AND IMPLEMENTATION.

- a. to provide incentives to all parties for the creation of intellectual property by providing a return to those who create and those who invest in such creation;
- b. to provide protection for the investment of persons or entities, including the College, to the extent such investment is substantial and particular rather than merely routine; and
