

## **Dawn Renee Bresnahan**

Assistant Professor  
Berry College

Animal Science  
P.O. Box 495003  
Mount Berry, GA 30149-5003  
(706) 238-7873  
dbresnahan@berry.edu

### **EDUCATION**

#### **Post-Doctoral Fellow**

2009-2014  
Emphasis: Equine Reproductive Physiology  
Principal investigator: Dr. Elaine Carnevale

Colorado State University  
College of Veterinary and Biomedical Sciences  
Department of Biomedical Sciences  
Fort Collins, CO

#### **Ph.D. Veterinary Science**

2003-2008  
Emphasis: Equine Reproductive Physiology  
Principal investigator: Dr. Barry Fitzgerald

University of Kentucky  
Gluck Equine Research Center  
Lexington, KY

#### **M.S. Veterinary Science**

2000-2003  
Emphasis: Equine Reproductive Physiology  
Principal investigator: Dr. Barry Fitzgerald

University of Kentucky  
Gluck Equine Research Center  
Lexington, KY

#### **B.S.A Animal Science**

1996-2000  
Advisor: Libby Luger

University of Georgia  
College of Agriculture and Environmental  
Sciences  
Athens, GA

### **PROFESSIONAL RESEARCH INTERESTS**

- Effect of maternal obesity on metabolism, inflammation, and lipid homeostasis in equine uteri and blastocysts.
- Examining the impact of obesity and metabolic disorders on the ovarian follicular environment.
- Evaluating differences in the metabolites in serum and follicular fluid from obese and non-obese mares, as well as embryo metabolism *in vitro* using non-targeted metabolomics.
- Characterizing the lipid fingerprint of individual oocytes and embryos to evaluate the impact of obesity and cell culture using laser assisted mass spectrometry.
- Using bovine oocytes in a heterologous assay for assessing equine sperm treatments for IVF.
- Examining the role of age and anti-inflammatory administration on the ovarian follicular environment and gene expression in granulosa cells.
- Evaluating alterations in the expression of maternal effects genes in individual oocytes from young and aged mares at varying time points during oocyte maturation.
- Bovine *in vitro* fertilization to evaluate culture techniques prior to use in equine oocytes and embryos.

**Ph.D. “The Impact of Insulin on the Matrix Metalloproteinase (MMP) System During Equine Follicular Development and Atresia”**

- Characterized the expression and activity of MMPs and their inhibitors (TIMP) in equine granulosa cells both *in vivo* and *in vitro*.
- Evaluated the impact of elevated insulin on MMPs and TIMPs *in vitro*.
- Evaluated the impact of elevated insulin on MMPs and TIMPs *in vivo*.

**M.S. “Development of a Model for Inducing Insulin Resistance in Mares: Implications Regarding the Duration of the Estrous Cycle”**

- Developed a method for inducing transient insulin resistance in mares.
- Used method to evaluate the impact of insulin resistance on the subsequent estrous cycle.

**PREVIOUS WORK EXPERIENCE**

**Equine Reproduction Lab, Colorado State University**

Fort Collins, CO

*Postdoctoral Fellow* (November 2009-present)

- Prepare and submit grants
- Manuscript preparation
- Design and implement experiments
- Mentor undergraduate and graduate students
- Use micromanipulation techniques to perform intracytoplasmic sperm injections (ICSI) for the clinical program and various research projects
- Assist with surgeries, ICSI, and other needs of the clinical assisted reproduction program

**Palmetto Arabians, LLC**

Timmonsville, SC

*Assistant Breeding Manager* (December 2008-October 2009)

- Consulted on design and supplies for new breeding center
- Taught and performed palpation and ultrasound per rectum to determine ovulation
- Determined pregnancy by ultrasound evaluation
- Performed collections and preparation of semen from stallions for use on site, cooling and transport
- Performed artificial insemination
- Trained and conditioned horses for future performance
- Performed general farm maintenance and managed supplies

**University of Kentucky-Department of Veterinary Science**

Lexington, KY

*Graduate Research Assistant* (August 2000 – October 2008)

- Designed and carried out experiments pertaining to attainment of the MS and PhD degrees
- Performed ultrasound guided transvaginal follicle aspiration (TVA)
- Inserted indwelling intravenous catheters and performed venipuncture for the collection of blood samples
- Performed radioimmunoassays, PCR, RNA isolations and numerous other lab procedures
- Developed primary tissue culture experiments
- Reviewed articles for publication
- Taught and undergraduate endocrinology lecture
- Performed statistical data analysis and manuscript preparation

**University of Georgia – College of Veterinary Medicine Teaching Hospital**

Athens, GA

*Large Animal Medicine Technician* (November 1999 – July 2000) - 25h/wk

- Performed numerous treatments on patients such as administration of eye medications and IV fluids
- Insertion of indwelling intravenous catheters
- Aided with endoscopy, and neurological exams as well as other veterinary medical procedures
- Processed incoming emergencies
- Submitted samples using hospital computer system

*Small Animal Surgical Orderly* (May 1998 – November 1999) - 20h/wk

- Implemented sterile technique for the proper handling and preparation of surgical procedures
- Disinfected and sanitized operating rooms after surgical procedures and prepared rooms for subsequent procedures
- Prepared animals for surgery
- Trained all newly hired surgical orderlies
- Stocked operating rooms with medical supplies as needed

*Small Animal Caretaker* (October 1997 – August 1998) - 20h/wk

- Inventoried and stocked surgical wards with treatment supplies
- Cleaned discharge cages for new patients
- Aided nurses and students with the administration of preventative and post-operative treatments
- Helped ensure the comfort and well-being of patients

### **TEACHING**

- Berry College, ANS 105, Introduction to Agricultural Sciences
- Berry College, ANS 120, Introduction to Animal Science
- Berry College, ANS 201, Orientation to Animal Sciences
- Berry College, ANS 326, Anatomy and Physiology
- Berry College, ANS 327, Reproductive Physiology
- Berry College, BCC 100, First Year Seminar
- Colorado State University Equine Reproduction Laboratory Short Courses- assist teaching the laboratory portions of the short courses including: artificial insemination, assisting the foaling mare, stallion collection, and evaluation, cooling, and freezing semen (2009-present)
- Colorado State University Equine Reproduction Laboratory Junior Practicum and Senior Rotations- assist teaching basics of equine reproductive clinical procedures such as mare palpation, artificial insemination, uterine lavage, and other techniques (2009-present)
- Guest lecturer for Colorado State University BMS 642-Research Techniques for Gametes and Embryos-lectures for sperm capacitation and IVF, and microinjection of sperm and cloning (2013)
- Guest lecturer for Colorado State University ANEQ 440-Equine Industry and Issues
- Guest lecturer for Colorado State University BMS 680-Comparative Reproductive Physiology

### **PROFESSIONAL ORGANIZATIONS**

- Honors thesis committee for undergraduate student Danielle Kurkowski (2013)
- Grand Awards Judge for the State of Colorado Science and Engineering Fair (2013)
- Planning committee for Colorado State University's College of Veterinary Medicine and Biomedical Sciences Research Day Symposia (2012 & 2013)
- Trainee member of the International Embryo Transfer Society (2012-present)

Dawn R. Sessions-Bresnahan

- Student member of the Society for Conservation Biology (2007-2010)
- Trainee member of the Society for the Study of Reproduction (2002-present)
- Trainee member of Equine Science Society (2001-present)

### ***AD HOC* REVIEWER**

- Reproduction Fertility and Development (2014)
- Theriogenology (2012)
- Animal Reproduction Science (2010)
- Journal of Animal Science (2007, 2008)

### **GRANTS**

- National Institutes of Health Contraception and Infertility Loan Repayment Program Award, “The relationship between aging, inflammation, and metabolism and fertility” (2012-2014, \$12,600)
- College Research Council, co-investigator, “Effect of maternal obesity on metabolism, inflammation, and lipid homeostasis in equine uteri and blastocysts” (2013-2014, \$13,600)

### **AWARDS AND HONORS**

- Member of Delta Epsilon Iota Academic Honor Society (2008-present)
- Graduate Research Assistantship, Department of Veterinary Science (2000-2008)
- Travel grants to present research at the Society for the Study of Reproduction and the International Federation of Fertility and Sterility conferences (2006)
- Graduate Student Representative of Gluck Equine Research Center (2002-2003)

### **RESEARCH TECHNIQUES**

#### **DNA and RNA:**

RNA isolation, RT-PCR and semi-quantitative real-time RT-PCR, spectrophotometry, gel electrophoresis, primer/probe design, sequence alignment, cDNA sequencing

#### **Protein:**

Radioimmunoassay, gelatin zymography, reverse gelatin zymography, Bradford total protein assay, Immunohistochemistry

#### ***In Vitro:***

Equine granulosa cell primary tissue culture, CHO, 3T3 cell line culture, adipocyte cell culture, *in vitro* fertilization, intracytoplasmic sperm injection (ICSI), culture and cryopreservation of ICSI produced embryos, confocal microscopy

#### ***In Vivo:***

Blood collection, drug administration (PO, IV and IM), jugular venous catheter placement, adipose tissue biopsy, hyperinsulinemic euglycemic clamp to test insulin sensitivity, rectal palpation and ultrasonography in mares, artificial insemination, embryo collection, and transvaginal follicle aspiration
